

Project Overview

As of May 3, 2013

James Road Improvements

Description and Benefits:

This project will reconstruct James Road from Livingston Avenue to Main Street. The roadway will be widened from 4 lanes to 5 lanes such that a two-way left turn lane or dedicated left turn lanes will be provided for the entire limits. In addition to the pavement work - the project will provide sidewalk and curb replacement; ADA accommodations; storm-water, and water line improvements; and traffic control, street lighting, and public and private utility work as needed.

Status:

In design.

Schedule:

Design is scheduled to begin in June 2012 and be completed in August 2013. Right-of-way acquisition will take place from December 2013 to May 2015. Construction is tentatively scheduled to start in 2015.

Costs:

Construction \$5.9 million (estimated)
